SOLAR ENGINEERING

RB Engineering can provide your solar business with the structural engineering support you need for both residential and commercial buildings.

RB Engineering can perform timely engineering inspections and evaluations for your current and pending solar projects. We can make any necessary adjustments, updates and corrections, stamp and deliver finished drawings to any state where we carry a license. To schedule an inspection or to learn more about our structural engineering services call our office today at **919.677.9662**

Our Capabilities:

We are professionally licensed throughout the southeast with licensing capabilities nationwide.

- Structural Analysis of New and Existing Construction for Solar Panel Installation
- Wind Engineering
